LM3911 IC DIP8 Temperatur Controller mit Operationsverstärker

LM3911 IC DIP8 Temperatur Controller mit Operationsverstärker

The LM3911 is a highly accurate temperature measurement and/or control system for use over a -25°C to $+85^{\circ}\text{C}$ temperature range. Fabricated on a single monolithic chip, it includes a temperature sensor, a stable voltage reference and an operational amplifier

Uncalibrated accuracy $\pm 10^{\circ}\text{C}$

Internal op amp with frequency compensation

Linear output of $10\text{ mV}/^{\circ}\text{K}$ ($10\text{ mV}/^{\circ}\text{C}$)

Can be calibrated in degrees Kelvin, Celsius or Fahrenheit

Output can drive loads up to 35V

Internal stable voltage reference

Solange Vorrat reicht
